

# Using Market Intelligence to inform vaccine procurement decision-making

Yangon VPPEF – 13 September 2019  
Loic Sanchez

UNICEF SUPPLY DIVISION

unicef  | for every child

# Session Plan

1. Scope and format of the session
2. Presentation of the Panelists/ Presenters
3. WHO and Country presentations
4. Panel discussion - Q&As
5. Wrap-up and next steps

# Expectations

Nr.	COUNTRY	EXPECTATION
1	Laos	to learn Vaccine security and pooled procurement
2	Timor-Leste	procurement post transition
3	Papua-New-Guinea	to learn financing modalities
4	Vietnam	how to produce vaccine Penta and IPV
5	Mongolia	to learning best practices of procurement and join learning paltform
6	Philippines	logistics and supply chain
7	Thailand	Increase vaccine security in the region, stock piling and sharing knowledge with partner
8	Indonesia	Harmonize regulation
9	Myanmar	self procurement of vaccine, to get sustainable financial processes

# Discussion Points

- Do you feel you are well-informed about the vaccine market? Especially about manufacturers you don't procure from?
- What challenges are you facing when collecting market information?
- Would you see any benefits in sharing information with countries in your sub-region? What information would you like to share/ access? Would you be willing to undertake Joint Market Researches with other countries from the sub-region?
- How do you use this information (e.g. MI4A, UNICEF, WHO)?
- Some MICs opt to procure EPI vaccines through UNICEF, how do these countries source their non-EPI vaccines?
- Do you forecast for Outbreaks/ Emergencies?
